

Background Properties:-

```
form{
    background-color: lightgray;
    /* background-color: "Mention Color"; is used to give background color */
    width: 300px;
    height: 300px;
}
body{
    background-image: url('./Images/Kohli.avif');
    /* background-image: url('url of the Background Image'); Gives
background Image to the Element */
    background-repeat: no-repeat;
    /* background-repeat: no-repeat; to stop repeating the
background-image */
    background-position: center;
    /* background-position: center; to put the background Image in
Center */
    background-attachment: fixed;
    /* background-attachment: fixed; to fix the background Image
fixed so that it will not scroll with the content */
}
```

Border:-

Border is used to give the Border to the content.

```
Syntax: border: 1px solid black;

    1px is the thickness of the border
    solid is the type of border
    black is the color of the border
```

Styles of Borders :-

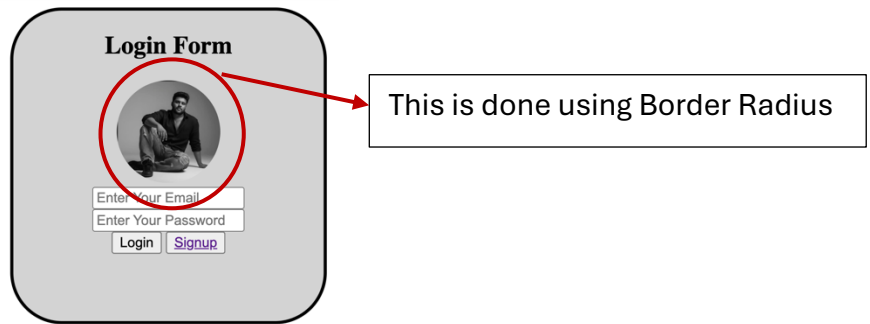

- **dotted** - Defines a dotted border
- **dashed** - Defines a dashed border
- **solid** - Defines a solid border
- **double** - Defines a double border
- **groove** - Defines a 3D grooved border. The effect depends on the border-color value
- **ridge** - Defines a 3D ridged border. The effect depends on the border-color value
- **inset** - Defines a 3D inset border. The effect depends on the border-color value
- **outset** - Defines a 3D outset border. The effect depends on the border-color value

- **none** - Defines no border
- **hidden** - Defines a hidden border

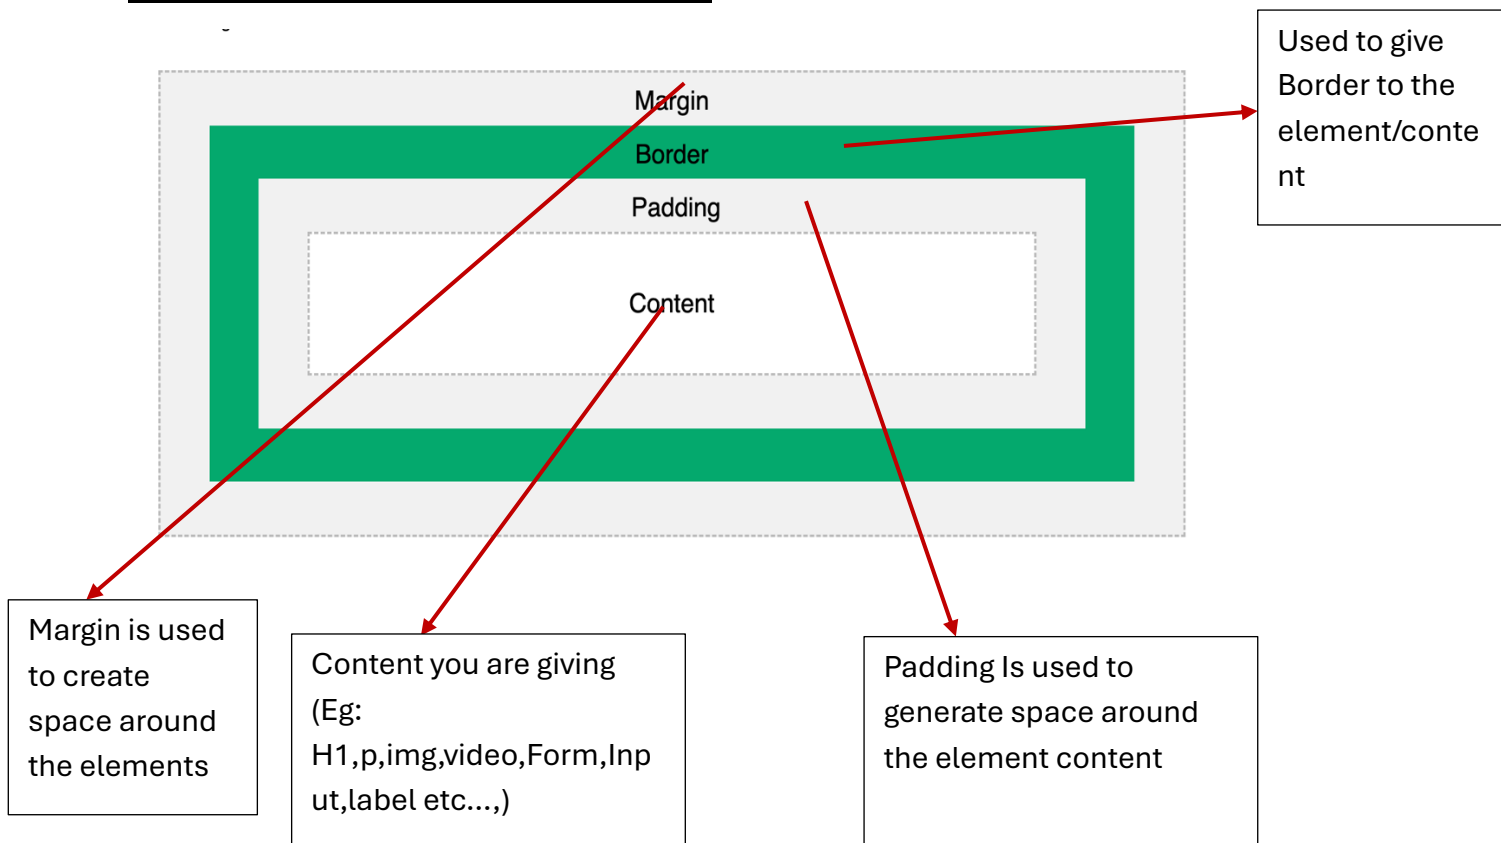

Border Radius : border-radius property is used to add rounded borders to an element:

Syntax :

```
form{
  background-color: lightgray;
  /* background-color: "Mention Color"; is used to give background color */
  width: 300px;
  height: 300px;
  border: 3px solid black;
  /* 1px is the thickness of the border
  solid is the type of border
  black is the color of the border */
  border-radius: 50px;
}
```
